P03: Awesome Final Open Project

1   Basic Requirements

1. Programming language: Matlab and Python (recommended), or other languages.

2. Three people in a team. List team members in your report, with **name**.

3. Submit your code under **Code** folder, and your data under **Data** folder.

4. Final project report under name **report.pdf** at the project root folder. Please follow the provided MS word or Latex template under **Writeup** folder. The maximum report length is 8 pages.

2   Project Check-list

1. Justify why you think the project is awesome;

2. Take at least one media type as your system's input;

3. The project involves programming and coding;

4. The project involves data collection;

5. Conduct Qualitative and/or Quantitative evaluation at the end

3   Submission Instruction

Please place your answers under one .zip file with a formatted file name: P02_ASUID.zip (for example, if your asu ID is 101010101010, then the file name should be P03_101010101010.zip), and send it to ASUCSE408@gmail.com. The .zip file shall include one folder with Matlab source code under name "code" and one report in .pdf format. Each group only needs one submission.

This assignment is due on midnight Dec 2nd. Submission will be accepted after deadline with a 20% reduction in value per day late.
